"Modernise Your Fuel

We are entering into another campaign. The objective—to reduce the "High Cost of Living." Your help and support is respectfully solicited.

The attack is being delivered on the flank where "The High Cost of Running" is at present entrenched and holding that sector.

'Zero' hour has passed! The 'barrage' has gone over! **MOTORADE** has made the breach, a mighty large one too, and with you gas users to reinforce, can consolidate and hold the position. The objective is gained.

We guarantee to reduce your present "High Cost of Running" from 25 to 40 per cent.

This reduction is brought about by increasing the mileage per gallon and at the same time increasing the power and pep of the engine.

Many local testimonials have been received and will be produced on enquiry. We quote from one:

"Gasoline treated with your preparation known as 'Motorade' produced twenty-seven and one-half per cent (27½%) more miles per gall. than gasoline not treated."

On a 25% reduction basis (with gasoline at 34 cents per gall.) an investment of 1½ cents—the cost of the amount necessary to treat one gallon of gasoline—in Motorade, saves seven cents nett on every gallon.

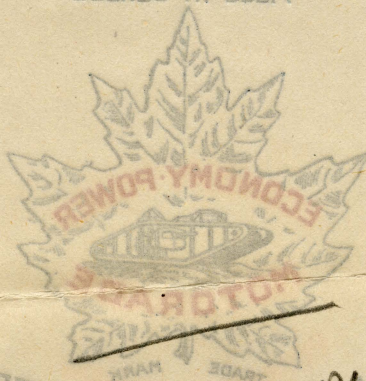

The Results are Guaranteed.

Motorade Co., Limited
